

# EXTERNAL PIM HUNTING SOLUTION KIT

SAF Tehnika's lightweight and easy to deploy PIM hunting kit helps quickly identify site-specific signal degradation due to external PIM. The kit includes a handheld spectrum analyzer that simplifies site inspection and PIM hunting. The flexibility for both audible and visual signal levels increase detection efficiency. Save site inspection findings for further analysis to the Spectrum Manager PC Software.

As mobile wireless networks become more complex and rooftops and towers become more crowded the possibility of external PIM dramatically increases. PIM doesn't just reduce performance – it can also effect the cell site's coverage footprint. The Spectrum Compact PIM hunting kit with the audible and visual indications simplifies identification of external sources.

### THIS KIT CONTAINS:

- ✓ Spectrum Compact handheld spectrum analyzer
- ✓ Complete set of RF filters and cable
- ✓ Industry leading PIM test probe
- ✓ N-type to SMA adapter, headphones w/USB-C to 3.5mm adapter

### LIGHT, PORTABLE, AND EFFICIENT KIT:

**Uniquely compact toolkit** with a spectrum analyzer  
**High quality PIM Test Probe and RF Filter**  
**Dedicated firmware** with Zero-Span and Audio indication
